**300k+**  
ICSRs  
processed  
per year.

Founded in 1997, Ergomed is dedicated to the provision of global specialized services in the pharmaceutical and biotech industry.

Today, Ergomed supports pharmaceutical companies with services spanning all phases of clinical trials, post-approval pharmacovigilance, and medical information.

Our business includes a full range of quality clinical research and clinical trial management services, recognized internationally in both orphan and oncology drug development for its expertise, as well as an industry-leading suite of specialized pharmacovigilance solutions.

By providing this full-service offering, Ergomed enables emerging and established life sciences companies to meet their regulatory obligations, maximize their drug development success, and therefore, their product value.

# Specialized Drug Development Solutions

**Our Clinical Research Organization (CRO) provides global, full-service Phase I-IV clinical development and trial management services. With a strong heritage in Europe and the United States of America, we assist clients by providing complete solutions tailored to their unique requirements.**

With experience in over 1800 trials, we planned, managed, monitored, and reported clinical trials with a range of technologies that include: small molecule drugs, monoclonal antibodies, and other targeted agents, as well as cancer vaccines, immunotherapy, radioactive agents, and photodynamic therapies.

Ergomed has proudly assisted clients with project directorship, project management, regulatory affairs monitoring, safety and medical monitoring, data management, biostatistics, medical writing, site management support, and study physician support.

**24+**  
years'  
experience

**40%**  
of workforce  
with PhD, MD  
or advanced  
degree

- Site management program specifically designed to increase study performance
- Dedicated Patient Engagement Officer
- Therapeutic specializations: oncology, respiratory, neurology and orphan.

# Our Strong Oncology Heritage

**Ergomed Clinical Research is an oncology leader with a sole focus on forming lasting relationships with our biopharmaceutical clients and passion in delivering novel, innovative cancer treatments to patients.**

Our seasoned team and diverse oncology experience are well-versed in successfully completing oncology study needs. We specialize in all areas of the clinical trial life cycle from feasibility to market approval.

Ergomed pairs our robust clinic teams with study physician models, unique site management, and advanced study designs to better support our sites, which results in quicker patient identification/enrollment. This also creates quality sample data across the globe, all while ensuring compliance and meeting local regulatory requirements.

**400+** oncology studies  
**42%+** of our study portfolio

**Recent study indications:**

- Oncolytic Virus
- Breast, Endometrial, Head & Neck, Gastric, Lung, Pancreatic, Prostate, and Ovarian Cancer
- Immuno-Oncology Trials
- Carcinoma, Leukemia, Lymphoma, Melanoma, Neuroblastoma
- Stem Cell Therapy
- Cellular & Gene Therapy.

# Discover Our Orphan Advantage

## **Ergomed is the leading expert in assisting biotech and pharmaceutical companies in orphan drug development.**

Our orphan disease toolkit reflects a genuine family and patient-centric approach to recruitment and retention. Our close links to patient advocacy groups maximize our partners' chances of success.

Ergomed is specialized in designing and executing complex clinical development programs requiring innovative regulatory and clinical approaches in Europe and the US.

Through our site management model and study physician team support, we find hard-to-locate patients around the globe and work with the investigative sites, creating the best designs to maximize clinical programs and registries.

**100+**  
unique  
indications

**300+**  
rare disease  
studies

- Thought-leaders in the orphan drug community
- True family and patient centricity and Patient Organization Advisory Board
- Global reach and access to patients with rare and ultra-rare diseases.

# Transforming Drug Safety

**PrimeVigilance provides global, top quality, cost-effective, innovative Life Cycle Management Services to enable emerging and established life sciences companies to meet their regulatory obligations and to maximize product value.**

PrimeVigilance covers the entire product life cycle, assisting clients with the effective management of their drug safety information, and offering expert consulting services from former regulators and opinion leaders.

Our drug safety services include: case management, signal management, risk management, audits, services of qualified persons for pharmacovigilance, training, strategic advisory, literature searches, and 24/7 multilingual medical information services.

PrimeVigilance covers the entire product life cycle, assisting clients with the effective management of their drug safety information, offering expert consulting services, and delivering global solutions for clinical safety, post-marketing pharmacovigilance to over 200 clients worldwide.

**13+**  
years'  
experience

**25+**  
QPPVs

[www.primevigilance.com](http://www.primevigilance.com)

- Global leader in QPPV services
- Multilingual 24/7 Medical Information Services
- Choice of leading drug safety databases
- Regulatory experts and key opinion leaders.

# Real World Evidence

## Strengthen the value of your products through Real World Evidence.

Real World Evidence brings credibility to your product's study results, as it satisfies the industry's ever growing need for more information about the real-life safety and effectiveness of medicines.

Ergomed provides a unique set of services specifically tailored to the specialized needs of pharmacoepidemiology and Real World Evidence generation studies.

Therapeutic Specialties include: oncology/hematology, neurology/CNS, and allergy/respiratory and orphan.

- Complete services for observational research, including PASS, registries and other peri-approval programs
- Expertise in various study types addressing clinical, medical affairs and market access objectives
- Unique fit-for-purpose operational strategy using dedicated processes and tailored real-world data collection solutions.

**110+**  
studies

**2.5k+**  
sites

**42k+**  
patients

Your guide and support along the  
drug development continuum.
