

Case study

Strengthening Safety Intelligence Through Integrated Multi-Source Literature Monitoring

OUTCOME

RELIABLE IDENTIFICATION
Of adverse events and other safety information

GREATER TRACEABILITY
Improved consistency across monitoring

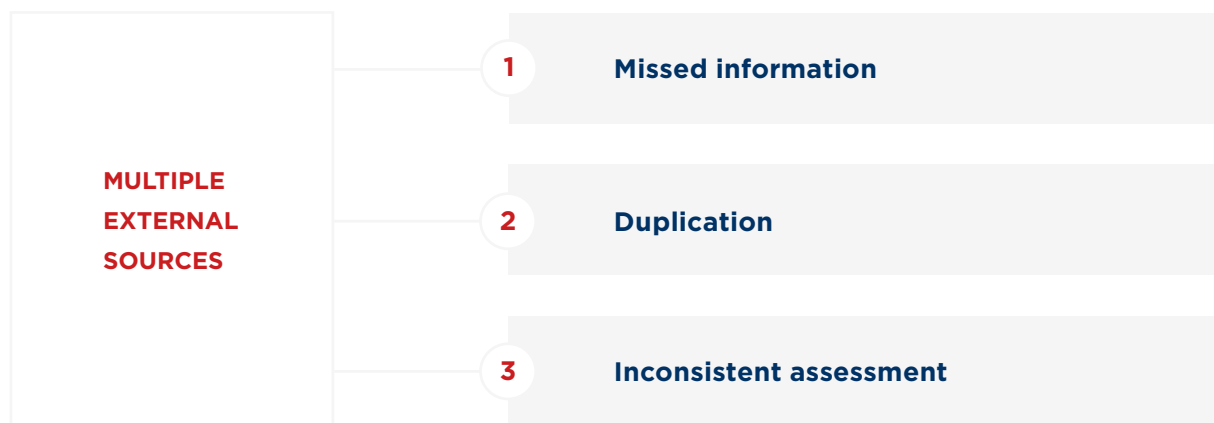

REDUCED DUPLICATION RISK

ALIGNED WITH CLIENT EXPECTATIONS

OVERVIEW | MULTIPLE LITERATURE SOURCES INCREASED THE RISK OF MISSED INFORMATION, DUPLICATION AND INCONSISTENT ASSESSMENT

The client required literature monitoring beyond standard databases, including multiple external sources. This increased complexity and the risk of missed information, duplication, and inconsistent assessments.

OUR APPROACH | ONE INTEGRATED SURVEILLANCE FRAMEWORK BROUGHT MULTIPLE INFORMATION STREAMS UNDER CONSISTENT CONTROL

PrimeVigilance established a structured literature surveillance framework integrating global database screening with additional external sources. Standardized review processes and quality controls ensured consistency across all monitored information streams.

WHAT MADE IT SUCCESSFUL

- Integrated Monitoring
- Standardized Assessment
- Consistent Quality Controls

As safety information sources expand, organizations need integrated monitoring models capable of identifying meaningful insights while maintaining compliance.
